

Building Information Modeling (BIM) Strategies

This seminar will review Building Information Modeling uses in the Intermountain Region. May Construction Services, a company that specializes in advanced 3D and 4D modeling and BIM consulting services will be the presenters.

Discussion to include:

- What's happening next with BIM
- Advanced model breakdown for clash detection purposes
- How to get up to speed and ahead of your competition
- Software tools used and which platform to choose for your type of work
- Field BIM tools and techniques that are coming next
- Concrete BIM: The Great Missing Link
- Hardware Configurations that will get you the best bang for your buck
- BIM, IPD, VDC...Which is it? It's not the words...It's about the process!
- Extensive Question and Answer Period...Basic to Advanced
