

Utah Chapter

## Seismic Bracing of Non-Structural Elements

Presented by the Structural Engineers Association Of Utah Seismic Committee

The Structural Engineers Association will present the requirements of IBC (International Building Code) Section 1613.1 and ASCE 7-05 Chapter 13. **The State Building Official will require the submittal of drawings and calculations to satisfy this code requirement before final drawings are approved.** This presentation will inform you of the code requirements, as well as the documentation to be submitted to the Building Official for approval.

The following are the Speakers and their Topics:

- John Masek, SE
  - Why is non-structural seismic bracing important?
  - Where is the current state of practice?
- Don Barker, SE
  - What must be braced?
  - Typical construction details (Do they work)?
- Stephen Cohen
  - Who is responsible?
  - What code documentation is required?
  - What to look for in the field

Date: Thursday, February 25, 2010

Time: 11:00 am – 1:00 pm (Lunch included)
